This brochure is printed on Stucco, a FSC® paper.
This paper is produced in factories that are accredited
EMAS and certified ISO 9001-14001, PEFC™
and FSC® CoC. It is produced using pulp that
has been whitened without either chlorine or acid.
The paper is entirely recyclable and is produced
from trees grown in sustainable forest resources.

The printing inks use organic pigments or minerals.
There are no use of basic dyes or dangerous metals
from the cadmium, lead, mercury or hexavalent
chromium group.

The printer, Art & Caractère (France 81500),
is engaged in a waste management and recycling
programme for all resulting by-products.

H125 BR 12-2019

AIRBUS

Undisputed Leader.

QUICK ROLE CHANGE FROM “TRUCK” TO “BUS” TO “CRANE” WITH EXCEPTIONAL SIMPLICITY

H125 is the undisputed leader in aerial work, passenger transport, airborne law enforcement and private business aviation, principally due to its undisputable performance in hot and high, operational simplicity and acquisition cost. It is now equipped in baseline with the new touchscreen flight display Garmin G500H TXi as well as a Crash Resistant Fuel System compatible with swing load operation. Hundreds of options and STC's (Supplement Type Certificates) are available to enlarge the scope of your missions.

H125 proven as the benchmark for aerial work.

In service for more than 40 years and the best seller in its class for the 3 last decades, H125 is constantly benefiting from this huge and increasing experience.

It is the preferred choice of all aerial work operators **for its excellent cost effectiveness and its superb performance** demonstrated by its unbeaten altitude landing world record.

H125 is able to transport its own empty weight with a sling capability of 1,400kg and can be equipped with FastFin that increases payload up to more than 50kg in altitude, a lean instrument panel and maximum pilot view kit that increase visibility and simplify pilot workload.

The eye in the sky.

H125 is the leader for Airborne Law Enforcement with its manoeuvrability and its multiple specialised police equipment options and STC. It has become the clear reference in the USA due to its impressive mission capability.

A red and white H125 helicopter is shown in flight, viewed from a high angle. The helicopter is flying over a river and a forested area. The main rotor blades are blurred, indicating motion. The tail rotor is also visible. The helicopter has "HNZ" and "Canadian Helicopters" written on its side, along with a logo. The landing gear is extended.

The best “Single” business generator.

In passenger transport, H125 can welcome up to 6 passengers, taking their luggage in 3 hold compartments that can also be enlarged under an STC. Passengers will appreciate the great visibility and comfort whatever their seat.

Fly the legend.

Designed for customers with a thrill for flying and who are not prepared to compromise on comfort and style.

A spacious, air-conditioned cabin fitted with the ACH Line high quality interior and finish, provides passengers with the highest level of comfort and elegance.

With the ACH125, travelling has never been so efficient and exciting.

ACH - Airbus Corporate Helicopters is the Airbus Helicopters offer dedicated to its private and corporate customers offering end to end service-based ownership experience.

ACH provides an exclusive platform from which customers can benefit from best in class Corporate and VIP transport solutions, tailored completion and service. ACH ensures that only the highest quality materials and the finest craftsmanship are offered to customers.

ACH range now features the ACH prefix: ACH125, ACH130, ACH135, ACH145, ACH160, and ACH175.

The world's highest life saver.

HEMS teams value the H125 for its exceptional 95% availability and its impressive operating costs. It can transport 1 patient and 2 medical crew at a speed of 140kts. The large cabin opening permits ease of loading and disembarking a stretchered patient.

H125 leads the competition for mountain rescue in challenging conditions - it has done several missions around 23,000ft in the Himalayas.
